

# hello, i am aaryan.

i am from **gurugram, india**. i am a **business student**, doing my bachelors in business administration. i am also a **self taught web developer**. i created an enterprise resource planner at the age of 17, using **laravel & tailwind**.

## personal profile

i am aaryan Kapoor, a **hardworking & optimistic** being. i like **marketing & design, + programming**. i am self taught, and have been working on freelance projects since 9th grade. if you don't see coffee on my table, find me on the nearest couch.

## skills & interests

my education has helped me inculcate various **marketing strategies, human resource management, & business enterprise analysis**.

i have developed several self taught skills over my schooling years which now come a lot in handy. i am grateful for that. many of these include **graphic design** [illustrator], **web dev** [php, js, rust & sql], **tooling** [git, nodejs, composer, cargo, nodejs]. i also contribute in open source projects.

apart from those, dealing with various clients around the globe has helped me a lot in developing **communication, problem solving & thinking abilities**.

sometimes, i might show up wearing sunglasses which means, i've haven't slept the previous night.

## achievements

- finalist, **'national level business plan competition' 2019**, world university of design.
- first [app development], **robotronics**, amity international school.
- first [app development], **cybertronix**, blue bells public school.
